

HOA APPROVAL WAIVER

IMPORTANT PROJECT INFORMATION FOR OUR VALUED CUSTOMER

Congratulations on your solar savings program with Energy Service Partners! We are thrilled to deliver a high-quality solar system for your home so that you can save money on energy costs and go green.

Our team has completed all of the design and permitting for your solar system. The only piece of information holding up your new solar delivery & setup is the written approval of the solar panels by your homeowner's association (HOA). You should have already submitted a completed application to the HOA for your solar system - please refer to the Design email sent to you previously for instructions if you still need to do so! In our experience, more than ninety-eight percent of HOA's approve the solar systems as submitted. Furthermore, the delivery & setup of the solar system on your home is protected by the California Solar Rights Act (California Civil Codes Section 714 and 714.1).

To expedite the approval of the solar system, we would like to give you the option to allow ESP to deliver & setup the solar system on your home while the written approval of the HOA is pending. If you choose this option, we can move forward and you can start saving money on your electric bill more quickly. In our experience, an estimated several weeks to several months of wait time can be shaved off prior to receiving HOA approval.

If you consent to allow ESP to deliver and set-up the solar system while the written approval of the HOA is pending, please sign below. Please note that you will be the primary responsible contact if the HOA has any questions or requires additional information. ESP will work to assist you in such an unlikely instance.

Thank you! We look forward to helping you save money and go green.

I have read the above letter and agree to allow Energy Service Partners to deliver and setup the solar system while the written approval of the HOA is pending.
